Appendix A: South East providers of apprenticeships 2008/09

1 Key messages¹

Apprenticeship participation

- Currently, there are 343 young people in-year undertaking apprenticeships in Slough; this number needs to rise to 811 by 2019/20 in order to meet government participation targets.
- In relation to other types of learning, apprenticeships are relatively small with only 7 per cent of 16-18 year olds taking up this form of learning. However, they are only slightly smaller than for the South East as a whole (9 per cent).
- In Slough, a slightly larger proportion of young people are in further education than regionally (39 per cent compared to 36 per cent) and a larger proportion are also in school sixth forms (26 per cent compared to 19 per cent).
- The trajectory to meet the target indicates that, in total, a 137 per cent increase is needed from 2007/08 figures to the 2019/20 target, which translates to a year-on-year increase of 7.4 per cent (on previous year's figures) in participation.
- There are significantly more Apprenticeships at Level 2 than at Level 3 (Advanced) being taken up in Slough (68.2 per cent compared to 31.8 per cent); this is a slightly lesser share of apprenticeships at Level 2 than regionally, but is in line with the national profile.
- Locally, Level 2 apprenticeships are preferred within Business administration; Children's care learning and development; Construction; Hairdressing; Vehicle Maintenance; and Customer service. Conversely, Level 3 appears to be the common level of study within Electrotechnical and Engineering apprenticeships. Plumbing has a more even distribution of study.

Apprenticeship learner characteristics

- The majority of apprentices resident in the local authority are above 19 years old, accounting for 55.6 per cent of learners.
- The gender balance for apprenticeships is similar to that of the regional and national profiles, with 35.6 per cent of learners being female and 64.4 per cent being male.
- However, an analysis of gender by framework of study reveals that there are significant gender imbalances with strongly stereotypical gender take up, with a majority of female learners taking for example hairdressing and childcare frameworks. Conversely, mostly male apprentices are taking wider construction; electrotechnical; engineering; and vehicle maintenance frameworks.
- Apprenticeship learners in Slough are to a far larger extent white than the 16-19 population (73.8 per cent compared to 49.2 per cent). All ethnic groups are underrepresented, but particularly Asian learners (17.8 per cent of apprentices compared to 41.8 per cent of the population). Apprentices in Slough are also much more likely than FE learners to be white (73.8 per cent compared to 48.3 per cent). Again, particularly learners of Asian origin are underrepresented in comparison (17.8 per cent of apprentices and 31 per cent of FE learners).
- Fewer apprentices than FE learners have a learning difficulty and/or disability (7 per cent compared to 10.7 per cent).
- Apprentices (16-18) in Slough come from all the local authority's wards and there are no clear clusters of apprentices in any particular parts of the local authority.

¹ Unless otherwise indicated, all comments within the key messages refer to apprentices **resident within** Slough.

- Colnbrook with Poyle; Cippenham Meadows; and Langley St Mary's wards have the highest share of apprentices (13 per cent, 12 per cent and 12 per cent respectively). The wards with the lowest share of apprentices in relation to the 16-18 year old population are Chalvey; Upton; and Farnham wards (3 per cent, 3 per cent and 4 per cent respectively).

Apprenticeships sectoral analysis

- In Slough, just over 130 employers take on apprentices, and most take on only one apprentice. Only 14 employers located in Slough took on five or more apprentices in 2007/08. The prevalence of employers with a single apprentice highlights the importance of SMEs for apprenticeship provision.
- Manor Tree is the largest employer of apprentices in the area, taking on 11 apprentices aged 16-18. Encouragingly, the largest employers of apprentices in the local area also appear as some of the largest employers of resident apprentices, suggesting there is strong recruitment within the local area.
- Nearly half of apprentices resident in Slough also work in Slough (46 per cent). The majority of the remainder of apprentices work in Buckinghamshire (13 per cent), Windsor and Maidenhead (9 per cent) and London (6 per cent), however, the employment location of 21 per cent of apprentices is unknown (no location recorded, or location incorrectly recorded, on the ILR).
- In Slough, there is a relatively even balance in the uptake of non-technical and technical apprenticeships, with a slight bias towards non-technical apprenticeships. Proportionally, the technical frameworks are stronger at Level 3, especially electrotechnical, engineering and IT services and development, indicating that Level 3 may be seen as the appropriate apprenticeship level for employers in sectors with employees in these occupations.
- The largest sectors of study are Administration; Transportation operations and maintenance; and Engineering. There is a high level of employment locally in all of the three main sectors, with employment in the public sector at 20.9 per cent, whilst the distribution, hotels and restaurant sector (which includes the motor industry) and the wider manufacturing sector (which includes engineering) account for 21.6 per cent and 13.7 per cent of employment respectively, indicating that the base for apprenticeship take up is very strong in these sectors (the two latter are also sectors with a strong apprenticeship tradition, which explains the already high levels of take up).

Apprenticeship provision patterns

- East Berkshire College in Slough is the largest provider of apprenticeships to young people resident in the local authority, with over 22 per cent of apprentices resident in the area attached to the college. Over two-thirds of all resident apprentices are engaged with a provider whose head offices are based outside the local authority.
- There are four providers of apprenticeships located in Slough, two of which have over 200 learners each (no others have over 50 learners).
- Apprenticeship framework success rates for these providers are varying, with East Berkshire College having average success rates only just over the threshold at 53.8 per cent, whilst Citroen UK and Slough Borough Council have good success rates at 76.2 per cent and 78.3 per cent respectively.
- East Berkshire College has a relatively concentrated recruitment area, drawing apprentices mainly from Slough and a nearby area with the college at the centre. Citroen UK has the widest reach of the training providers, drawing learners not only from the South East, but from the whole country.

2 Policy context

Apprenticeships provide work-based training to young people and adults who want to learn new skills and gain qualifications while working and have been an integral part of the UK educational system, in various forms, for a significant period of time. The contemporary apprenticeship system is aimed at addressing the shortage of intermediate vocational skills that exists in the UK compared to a number of European countries.

An Apprenticeship (Level 2) and Advanced Apprenticeship (Level 3) **framework** consists of four parts:

- National Vocational Qualification (NVQ);
- Technical Certificate e.g. BTEC National Diploma;
- Key Skills qualifications; and
- Employment Rights and Responsibilities.

Recent apprenticeship policy and legislation

The commitment by government to significantly expand the Apprenticeship programme was expressed in its Apprenticeship strategy, *World-class Apprenticeships: Unlocking Talent, Building Skills for All*, published by the Department for Innovation, Universities and Skills (DIUS) in January 2008.

The strategy recognises that Apprenticeships will be crucial in supporting the raising of the compulsory participation age in education and training to 18 by 2015, and sets out an **entitlement** for all suitably qualified young people to an Apprenticeship place by 2013. To be able to deliver on this entitlement, the number of apprenticeship places will have to increase significantly. The strategy sets out the ambition to make Apprenticeships a mainstream option for post-16 learners and the aim is that by the end of the academic year 2019/2020, one in five young people will take up an apprenticeship.

In addition, Apprenticeship standards are being strengthened through the creation of a standard Apprenticeship blueprint; a drive for improved quality, and integrating Apprenticeships into the Qualifications and Credit Framework (QCF). A new delivery system is also being set up, with the customer-facing National Apprenticeship Service (NAS) having responsibility for the programme.

In February 2009, the Apprenticeships, Skills, Children and Learning Bill was published. The bill is a major stepping stone in achieving the targets laid out in the Apprenticeship strategy, putting apprenticeships – as well as the majority of proposals in the strategy – on a statutory basis. In addition, the bill requires schools to include information on apprenticeships in all impartial careers advice.

The bill also sets out the transfer of the responsibility for commissioning and funding all education for 16-19 year olds, including apprenticeships, from the LSC to local authorities. Local authorities will pass on to the new Skills Funding Agency (SFA) – who will oversee NAS – the number of apprenticeship places required and it will then fall on NAS to secure the appropriate number of places.

Early in 2009, government announced an expansion of apprenticeships by funding an additional 35,000 places, and in particular using the power and size of the public sector to support the expansion. In February, DIUS announced that 21,000 of these places would be created in the public sector: 5,000 in the NHS and social care; 2,500 in FE colleges and universities; 7,500 in local government; 4,500 in schools and children's services; 1,000 more places in MOD civilian apprenticeships; and more than 600 apprentices in other Government departments. There will also be a requirement on contractors for the Building Schools for the Future programme to have apprenticeship training programmes in place.

Targets and barriers to success

The key government targets relating to apprentices include:

- **130,000 apprenticeship completions** a year in England by 2013;
- **400,000 apprentices in learning** in England by 2020, which is estimated to equate 190,000 completions and 250,000 starts by 2020; and
- **One in five young people** to be undertaking an apprenticeship by the end of the academic year 2019/2020.

The success of the apprenticeship work-based learning system is governed by three factors: demand for places from learners; demand for trainees and places by employers; and the appropriateness of the provider and funding mechanisms that allow these two to be matched. A number of broad thematic challenges to increasing the number of apprentices can be identified in the literature, namely:

- a lack of clarity in the conflicting drive to increase numbers in apprenticeships, diplomas, and higher education;
- quality and relevance of apprenticeship frameworks, and the associated delivery infrastructure;
- provider quality and capacity; and
- employer demand and barriers to engagement.

Key organisations

National Apprenticeship Service (NAS)

The government Apprenticeship strategy, *World-Class Apprenticeships: Unlocking talent, building skills for all*, set out the creation of a National Apprenticeship Service (NAS) from April 2009. NAS will have end-to-end responsibility for the delivery of Apprenticeships, including targets, funding and the national vacancy matching service for employers (on-line Apprenticeship vacancies) and potential apprentices. NAS will also have ownership of the Apprenticeships blueprint.

Furthermore, NAS' ambition will also be to boost employer take-up by repositioning apprenticeships with employers; improve the information on apprenticeships within careers advice and increase take up across the ability range; tackle issues of under representation by various groups in apprenticeships; and to develop provider and employer training capacity to support the expansion of the programme.

NAS was officially launched in April 2009 and its NAS Prospectus² was published in May 2009. This set out the following priorities for 2009-2010:

- To expand the number of Apprenticeship places offered by employers, including those in the public sector;
- To increase the number, quality and background of people applying for Apprenticeships, and in particular supporting 16 – 18 year olds;
- To make it easier for employers and individuals to search and apply for vacancies through the online Apprenticeship Vacancies system;
- To develop and implement Service Quality Standards to all key stakeholder groups;
- To ensure that the funding for Apprenticeship places is available, responsive to need and delivers value for money;
- To develop high-quality data and management information, supported by ongoing research in Apprenticeship delivery;

² Available from www.apprenticeships.org.uk

- To deliver a Marketing and Communication Strategy that ensures that stakeholders are aware of the benefits of Apprenticeships;
- To recruit, develop and support all staff within NAS;
- To develop a policy analysis programme which focuses on the immediate and longer-term needs to improve the quality of Apprenticeships.

NAS will operate at a national, regional and sub-regional level, and will work closely with local authorities, especially on the commissioning of apprenticeships for 16-18 year olds.

At a regional level, NAS will have two Directorates:

- Employer Services, which will promote apprenticeships and the on-line Apprentice vacancies system to employers; assist employers and offer expertise on apprenticeships; and ensure the full apprenticeship engagement service from enquiry to completed apprenticeship works for the employer. The field force will also be responsible for growth strategies for their area.
- Learner Services, which will support organisations that work with learners to promote Apprenticeships and the on-line system to young people and their parents; strengthen the Apprenticeship experience and improve attitudes to vocational training; solve problems that arise with the system; and provide key management information and data on Apprenticeship recruitment.

Sector bodies

Sector Skills Councils (SSCs) and Standard Setting Bodies (SSBs) have a key role in supporting apprenticeship expansion and development. In particular, these bodies have a key responsibility for the frameworks offered, in terms of content and standard.

SSCs/SSBs have responsibility for developing new frameworks; set and monitor framework standards; issue frameworks and maintain their currency; and ensure that there is coherence in the range of Apprenticeship frameworks within their sector.

Operational Policy

Identifying and Managing Underperformance

The Further Education Reform White Paper, *Further Education: Raising Skills, Improving Life Chances* (2006) made the commitment to eliminate inadequate or unsatisfactory provision in the post 16 sector by September 2008. This led to the implementation of new procedures used for the first time to commission provision for 2008-2009, these reviewed three aspects of provider performance, inspection outcomes, financial health monitoring and, analysis of success rates against minimum levels of performance to inform commissioning decisions.³

A contract for new starts is not issued to a provider with a grade 4 inspection outcome. This is applied at provider level where they had been judged overall inadequate or at curriculum level for the inadequate area(s). The learners' best interests will determine whether existing learners should be transferred to a different provider.

Minimum levels of Performance apply to success rates⁴ for full Apprenticeship frameworks (Apprenticeship and Advanced Apprenticeship) delivered by FE colleges and training providers. When introduced the minimum level of performance for both Apprenticeships and Advanced Apprenticeships was 40% at sector framework level.

³ LSC Identifying and Managing Underperformance January 2007

(Sum of apprenticeship frameworks achieved)

⁴ Overall success rate % = $\frac{\text{Sum of learners who were expected to achieve excluding continuers} + \text{sum of those who completed early}}{\text{Sum of learners who were expected to achieve excluding continuers} + \text{sum of those who completed early}}$

The minimum level of performance was raised for 2009-2010 contracting decisions to 50%, applied at sector framework level. However, commissioning decisions were based on the success rate at sector subject area (SSA) and framework level on the combined framework success rate (i.e. the aggregated Apprenticeship and Advanced Apprenticeship performance. Commissioning decisions were made on the following basis:

- SSA above 50%: all frameworks within SSA retained. Provider self assessment action plan required to address poor performance. No growth in poorly performing frameworks.
- SSA 45 – 49.9%: all frameworks within SSA retained. Contractually binding performance indicators for frameworks below 50% No growth in poorly performing frameworks.
- SSA below 45%: all frameworks below 45% withdrawn/wound down. Provider unable to regain them through OCT. Frameworks above 50% retained, negotiated growth.

Scope of Provision

Apprenticeships are delivered by:

- independent private training providers,
- employers,
- general further education colleges, and
- sixth form colleges.

In 2007-2008 there were 138 separate Apprenticeship contracts managed in the SE region, in 2008-2009 are 148. While there has been an overall increase of 10 in the number of contracts, the extent of change to the list is much greater than this, for example contracts were let with 28 new providers for 2008-2009.⁵

These changes occurred for a variety of reasons, for example:

- implementation of the LSC's MLP policy for 2007-2008 contract year
- provider insolvency
- provider decision to withdraw from Apprenticeship delivery
- contract management transferred to another region
- use of open and competitive tendering to expand the provider base
- negotiated commissioning with providers who already held an LSC contract.

Single Contract

Single contracting arrangements have been introduced during 2008-2009 for the nine largest pan-regional Apprenticeship providers⁶. This means that all funding, budgetary and contractual discussions and decisions for Apprenticeships will be taken by the identified lead region for these providers. This pilot activity is planned to be rolled out during 2009-2010 for all Apprenticeship providers.

⁵ See appendix A for a full listing of Apprenticeship providers for 2008-2009

⁶ CITB, Economic Solutions, JHP, JTL, NACRO, Protocol Skills, Rathbone Training, VT Training and YMCA.

3 Apprenticeship participation

Participation in other post-16 learning

Relevance

The forms of post-16 education and training that young people in a local authority engage with indicate preference, but can also reflect the availability on offer and access to training. With a finite pool of young people, if apprenticeship learning is increased, there may be a fall in other types of learning, impacting on budgets and physical space requirements of institutions. Although an increase in the take up of apprenticeships could affect the take up of other types of learning, it could also mean capturing young people who are currently out of learning, but for example are in employment without training, in a job that could support an apprenticeship framework.

How can I use it?

The numbers for participation in the different types of post-16 learning can be used to monitor and adjust for any impact of increase in the uptake of apprenticeships on other learning (such as budget and space requirements).

Key points

- In Slough, a slightly larger proportion of young people are in further education than regionally (39 per cent compared to 36 per cent) and a larger proportion are also in school sixth forms (26 per cent compared to 19 per cent).
- In relation to other types of learning, apprenticeships are relatively small with only 7 per cent of 16-18 year olds taking up this form of learning. However, they are only slightly smaller than for the South East as a whole (9 per cent).
- There is a slightly higher level of take up of Entry to Employment (E2E; Foundation Tier Learning (FLT) under the new funding streams) in Slough than in the South East at 2 per cent of the young population (16-18).

Participation in post-16 learning, learners resident in Slough

	Slough		South East	
	Numbers	% of 16-18 population	Numbers	% of 16-18 population
Apprenticeships	343	7%	28,823	9%
Other WBL (mainly E2E)	83	2%	4,650	1%
Further education	1,803	39%	115,223	36%
School Sixth Form	1,213	26%	60,805	19%
2008 Population estimate 16-18 (n)		4,595		323,239

Source: ILR200708 F05, W12.

Apprenticeship starts and in-year participation

Relevance

Participation is the key measure of the uptake of apprenticeships; it is the basis for planning, budgeting for, and commissioning provision in the area. The in-year participation is also the measure for the apprenticeship target of one in five young people engaging in apprenticeships.

- **Starts** indicates the number of young people who start an apprenticeship within a given academic year.

- **In-year participation** (also referenced as participation) indicates the number of young people who are undertaking an apprenticeship at some part of a given academic year – this figure therefore includes learners who have started an apprenticeship late in the previous academic year, and continued in the academic year in question.

Figures in this section relate to young people (16-18) resident in the local authority.

How can I use it?

Starts and participation numbers are key for the education and training budgeting and commissioning processes in the local area, as well as measuring progress towards targets.

Key points

- In 2007/08, there were 343 young people resident in Slough undertaking apprenticeships.
- The local authority has a share of young people in apprenticeships only slightly lower than the region and somewhat lower than England, at 7 per cent of the young population (South East 9 per cent, England 11 per cent).
- Apprenticeship starts and participation have fluctuated heavily in the last five years, peaking in 2006/07 at 191 starts and 395 apprentices in learning, with numbers having slightly fallen again during the last year (starts by 15 per cent, participation by 13 per cent).
- The later decrease could be due to policy changes, such as cutting of low quality provision. As for the South East and England, Slough has now recovered to a level of starts (but not participation) that is higher than in 2003/04.

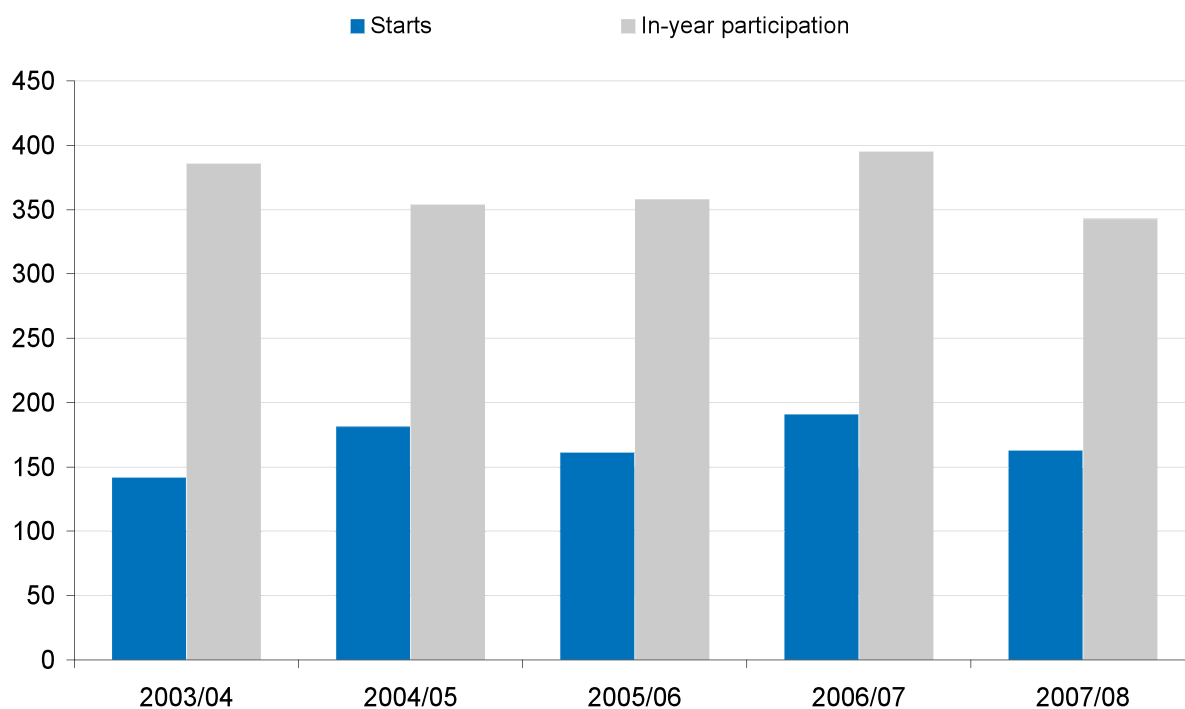

Apprenticeship starts and participation 2007/08

	Starts	In-year participation	Participation share of 16-18 year olds (%)
Slough	163	343	7%
South East	13,820	28,823	9%
England	106,070	221,657	11%

Source: ILR 2007/08 W12, Experian.

Apprenticeship participation – trajectory to meet government targets⁷

Relevance

This is the main government target for apprenticeships, as expressed in its Apprenticeship strategy '*World-class Apprenticeships: Unlocking talent, building skills for all*' (DIUS,2008). The key target is for one in five of all 16-18 year olds to be enrolled on an apprenticeship before the end of the academic year in 2019/20.

How can I use it?

The trajectory has been calculated as a steady increase from current participation numbers to one-fifth of young people as forecasted for 2020. This trajectory can help the local authority plan for increased apprenticeship places year on year, to meet the target.

Key points

- Currently, there are 343 young people in-year undertaking apprenticeships in Slough; this number needs to rise to 811 by 2019/20 in order to meet government participation targets.
- This trajectory indicates that, in total, a 137 per cent increase is needed from 2007/08 figures to the 2019/20 target, which translates to a year-on-year increase of 7.4 per cent (on previous year's figures) in participation.
- In absolute numbers, this translates to increases escalating from an increase of 25 additional apprentices in 2008/09 to 59 additional apprentices in 2019/20.
- It should be noted that a rise in 16-18 year olds undertaking apprenticeships will have an effect on other types of learning, e.g. school sixth forms and FE.

⁷ Experian population projections based on ONS estimates, as set out further on in this report , have been used to calculate the trajectory.

Trajectory required to meet government apprenticeship target

Source: ILR W12, 2003/04-2007/08.

Apprenticeship learners required each year to meet government target

	Participation	Participation share of 16-18 year olds (%)
2007/08 (actual)	343	7%
2008/09	368	8%
2009/10	396	9%
2010/11	425	10%
2011/12	456	11%
2012/13	490	12%
2013/14	526	13%
2014/15	565	14%
2015/16	607	16%
2016/17	652	17%

Level of apprenticeship study

Relevance

The level of apprenticeship that a young person will be taking up will depend on the need of the job role. An Advanced Apprenticeship (Level 3) requires the young person to already hold a Level 2 qualification, but a young person who holds another Level 2 qualification will not necessarily start at Level 3 – the job role determines the appropriate starting point. It is important to understand the economic profile and occupational mix of the area, to be able to plan the level of provision offered and where to target expansion.

How can I use it?

The information on the levels of apprenticeships available and taken up can be used in conjunction with information on the skills need of the local economy (sector profile and occupational mix) to determine a suitable qualification offer. The figures on the balance between Level 2 and Level 3 (advanced) apprenticeships could be used alongside information on Key Stage 4 achievement and population qualification level to ensure there are sufficient progression routes available.

Key points

- Locally, Level 2 apprenticeships are preferred within Business administration; Children's care learning and development; Construction; Hairdressing; Vehicle Maintenance; and Customer service. Conversely, Level 3 appears to be the common level of study within Electrotechnical and Engineering apprenticeships. Plumbing has a more even distribution of study.
- There are significantly more Apprenticeships at Level 2 than at Level 3 (Advanced) being taken up in Slough (68.2 per cent compared to 31.8 per cent); this is a slightly lesser share of apprenticeships at Level 2 than regionally, but is in line with the national profile.
- The level of advanced apprenticeship take up in the county indicates that a higher proportion to the region of apprenticeship take up is in sectors where the Level 3 apprenticeships are standard or preferred.
- The success rates for the Apprenticeship at Level 2 as well as the Advanced Apprenticeship in Slough are reasonable, above 50 per cent, but are lower than in the region as a whole, with for example construction at Level 2 having low success rates at 38.1 per cent (compared to 47.7 per cent regionally and 53.2 per cent nationally).

Apprenticeship learners by level of study

	Slough		South East		England	
	%	Number	%	Number	%	Number
Apprenticeship	68.2%	234	71.1%	20,493	68.9%	152,656
Advanced Apprenticeship	31.8%	109	28.9%	8,330	31.1%	69,001

Source: ILR2007/08 W12.

Apprenticeship learners by level of study

Source: ILR2007/08 W12.

Apprenticeship success rates by level of study⁸

	Slough Success rate	South East Success rate	England success rate
Apprenticeships	54%	62%	62%
Advanced Apprenticeships	56%	67%	66%
All apprenticeships	55%	64%	64%

Source: ILR2007/08 W12.

⁸ The full framework success rate has been used. It should be noted that success rates is a provider measure, and cannot be calculated on a learner basis. Therefore, success rates for Slough have been calculated based on providers located within the local authority, and not learners resident within the area.

4 Apprenticeship learner characteristics

Apprenticeships – demographic profile of learners

Relevance

The demographic profile of apprenticeship learners can indicate the attractiveness of the offer to young people, but also how it is being marketed to young people and employers. Apprenticeships should offer an opportunity to young people regardless of, gender, ethnicity and disability, so a balancing of the offer is important to ensure it is attractive to all. It should be noted that the employer also has an important role in ensuring equality of opportunity for prospective apprentices.

How can I use it?

The statistics on learner demographics can be used to – along with employers - address any imbalances in apprenticeship take up, for example encouraging more take up by of non-traditional apprenticeships (e.g. construction for women, childcare for men), or changing local perceptions of apprenticeships.

Key points

Age

- There are fewer 16-18 year old apprenticeship learners in Slough (44.4 per cent) than both regionally and nationally (48.4 per cent and 53.2 per cent respectively; as a proportion of apprentices of all ages).
- The majority of apprentices resident in the local authority are above 19 years old, accounting for 55.6 per cent of learners.

Gender (16-18)

- The gender balance for apprenticeships is similar to that of the regional and national profiles, with 35.6 per cent of learners being female and 64.4 per cent being male.
- However, an analysis of gender by framework of study reveals that there are significant gender imbalances with strongly stereotypical gender take up, with a majority of female learners taking for example hairdressing and childcare frameworks. Conversely, mostly male apprentices are taking wider construction; electrotechnical; engineering; and vehicle maintenance frameworks.

Ethnicity (16-18)

- The ethnic profile of apprentices in Slough is very different to the region and England as a whole, with a much smaller share of learners being white. Apprenticeship learners in Slough are to a far larger extent white than the 16-19 population (73.8 per cent compared to 49.2 per cent). All ethnic groups are underrepresented, but particularly Asian learners (17.8 per cent of apprentices compared to 41.8 per cent of the population).
- Apprentices in Slough are also much more likely than FE learners to be white (73.8 per cent compared to 48.3 per cent). Again, particularly learners of Asian origin are underrepresented in comparison (17.8 per cent of apprentices and 31 per cent of FE learners).

Learning difficulty and/or disability (16-18)

- Slough has a low proportion of resident apprenticeship learners with a learning difficulty and/or disability (7 per cent), lower than the South East and England (12.1 per cent and 11 per cent respectively).
- Fewer apprentices than FE learners have a learning difficulty and/or disability (7 per cent compared to 10.7 per cent).

Apprenticeship learner demographic profile

	Slough apprentices (% of total)	South East apprentices (% of total)	England apprentices (% of total)	Slough 16-19 population
Age

Where do Apprenticeship learners in Slough live?

Relevance

The residence of apprenticeship learners is important to understand, to ensure that there is sufficient availability and access to provision throughout the local authority. It is also important to see whether young people in deprived as well as less deprived areas are taking up apprenticeships to ensure that they reach all parts of the community.

How can I use it?

The information on learner take up by ward and by the level of deprivation of the ward can assist planning to ensure that provision is reaching all parts and communities in the local authority and assist in planning for all 16-19 education and training provision.

Key points

- Apprentices (16-18) in Slough come from all the local authority's wards and there are no clear clusters of apprentices in any particular parts of the local authority.
- Colnbrook with Poyle; Cippenham Meadows; and Langley St Mary's wards have the highest share of apprentices (13 per cent, 12 per cent and 12 per cent respectively).
- The wards with the lowest share of apprentices in relation to the 16-18 year old population are Chalvey; Upton; and Farnham wards (3 per cent, 3 per cent and 4 per cent respectively).
- Britwell ward, which is among the 20 per cent most deprived wards in England, has a relatively high share of apprentices as 10 per cent of the young population.

Slough apprentices by ward

Ward	Apprentices	16-18 population	Apprentices as share of 16-18 population
1 Baylis and Stoke	30	313	10%

5 Apprenticeship employment and sector of study

Large apprenticeship employers in Slough

Relevance

Knowing the profile of apprenticeship employers in the area is important to understand in which sectors, areas, or sizes of businesses apprenticeships can be further marketed. It is also important to know who the key employers in the area are – if a few employers employ a large share of apprenticeships, or if apprentices are concentrated in particular sectors affected by the recession, this could pose a risk to apprentices during the downturn, if companies are making people redundant, as young people may be the last in and the first out.

How can I use it?

The information on employers engaging in Apprentices in the area can be used for targeting and marketing of apprenticeships, as well as in comparison with the business base to support expansion plans. The information can also be used to monitor the risk to apprentices during the economic recession.

Key points

- In Slough, just over 130 employers take on apprentices, and most take on only one apprentice. Only 14 employers located in Slough took on five or more apprentices in 2007/08.
- Manor Tree is the largest employer of apprentices in the area, taking on 11 apprentices aged 16-18. Encouragingly, the largest employers of apprentices in the local area also appear as some of the largest employers of resident apprentices, suggesting there is strong recruitment within the local area.
- The prevalence of employers with a single apprentice highlights the importance of SMEs for apprenticeship provision.

Travel-to-work patterns

Relevance

Understanding the travel to work patterns for apprenticeship learners resident in Slough important, to establish whether there is sufficient employer engagement with apprenticeship and appropriate local availability of apprenticeship opportunities. Naturally, more specialised employment sectors or a large employer located in a neighbouring area may still mean that learners will travel.

How can I use it?

This information can be used to see learners' travel patterns for their apprenticeships, and to further investigate the reasons why they go out of area: do they go because of lack of local opportunities; easy travel routes; closer location to home; attractiveness of employers outside the area; or a specialist occupational offer?

Key points

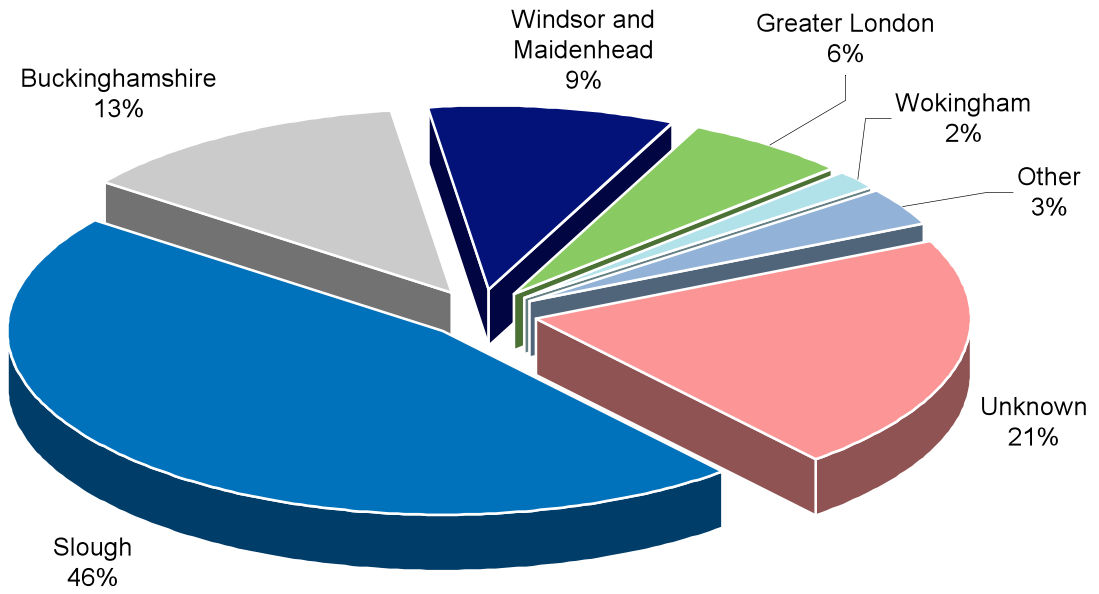

- Nearly half of apprentices resident in Slough also work in Slough (46 per cent).
- The majority of the remainder of apprentices work in Buckinghamshire (13 per cent), Windsor and Maidenhead (9 per cent) and London (6 per cent), however, the employment location of 21 per cent of apprentices is unknown (no location recorded, or location incorrectly recorded, on the ILR).
- For apprentices who travel outside the area to work, the most popular frameworks are Vehicle maintenance and repair; Construction; Hairdressing; Business administration; and Electrotechnical, which together make up 56.5 per cent of resident apprentices working outside the local area.
- When looking at apprentices who work in the local authority, the picture looks similar; 52 per cent are also resident in the area. The majority of the remainder of apprentices travel into work in Slough from Buckinghamshire (17 per cent), London (14 per cent) and Windsor and Maidenhead (8 per cent).

Main frameworks for apprentices who travel outside Slough to work

Framework	Apprentices	% of apprentices travelling out of area
Vehicle Maintenance and Repair	24	13.0%
Construction	21	11.4%
Hairdressing	21	11.4%
Business Administration	20	10.9%
Electrotechnical	18	9.8%

Apprenticeship frameworks⁹

Relevance

A **framework** is the integrated programme of learning in an occupational area – for example engineering, accountancy or customer service – that constitutes an apprenticeship. A framework consists of four elements: and NVQ; a technical certificate; Key Skills; and employment rights and responsibilities. There are over 120 frameworks available nationally (nearly 200 if frameworks at Level 2 and Level 3 are counted separately). Knowing the framework offer available in the local authority is important first as an indicator of learners' preferences and how apprenticeship are marketed to young people, but also to understand which businesses currently take up apprenticeships and whether there are sectors which are underrepresented and could be targeted for apprenticeship expansion. It should be noted that there are a number of frameworks that are currently not covered by a Sector Skills Council (SSC); these tend to be covered by a Standard Setting Board (SSB) instead, e.g. teaching assistants who are covered by TDA.

How can I use it?

The data on frameworks currently offered can be used to see if there is a wide engagement and offer, and matched to the business base, it may provide information on sectors that have potential for apprenticeship take up, but are currently not engaging or being served through the framework offer.

Key points

- The vast majority of learners (81.9 per cent) are undertaking one of only ten frameworks (see table), with business administration, vehicle maintenance, childcare, hairdressing and electrotechnical engaging over half of all apprentices.
- In Slough, there is a relatively even balance in the uptake of non-technical and technical apprenticeships, with a slight bias towards non-technical apprenticeships.
- Proportionally, the technical frameworks are stronger at Level 3, especially electrotechnical, engineering and IT services and development, indicating that Level 3 may be seen as the appropriate apprenticeship level for employers in sectors with employees in these occupations.
- Many of the largest five frameworks in Slough have experienced both upturns and downturns in the last five years; business administration, electrotechnical and hairdressing frameworks have experienced an overall decrease in participation since 2003/04. In contrast, vehicle maintenance and repair and children's care learning and development have experienced a substantial overall increase (albeit the latter with a slight decrease in 2007/08).

⁹ In this section, by 'technical' frameworks we mean e.g. construction, engineering and vehicle related frameworks, whilst 'non-technical' refers to e.g. hairdressing, childcare, business administration and customer service.

Top 10 frameworks undertaken by learners resident in Slough

Apprenticeship sector of study

Relevance

As for the frameworks, the sector of study (an Ofqual framework to categorise qualifications into sectors) provides similar information on learners' preferences and in which sectors employers want their employees to learn, but also an understanding of which sectors currently take up apprenticeships and whether there are sectors which are underrepresented and could be targeted for apprenticeship expansion. It should be noted that the sectors of study do not clearly map either to administrative sector definitions such as Standard Industry Classification (SIC) or the SSC footprints.

How can I use it?

The data on sector of study can be used to establish where IAG can be further used to stimulate interest in sectors with a low uptake, and to ensure that the right learners are being referred to programmes. It can also help the local authority to further engage with NAS to develop underrepresented sectors.

Key points

- The profile is evenly balanced between technical and non-technical areas, with the largest areas of study being Administration; Transportation operations and maintenance; and Engineering.
- Frameworks within the Administration SSA are taken up by a multitude of sectors, mostly by employers within public sector organisations such as local authorities, but also by for example further and higher education institutions, financial services, engineering, logistics and construction firms; frameworks within the transportation operations and maintenance SSA are taken up mainly by the motor industry and technical companies; whilst frameworks within the engineering SSA are taken up by engineering and construction companies, public sector organisations such as local authorities and also within the transport and logistics sector.
- As section 7 shows, there is a high level of employment locally in all of the three main sectors, with employment in the public sector at 20.9 per cent, whilst the distribution, hotels and restaurant sector (which includes the motor industry) and the wider manufacturing sector (which includes engineering) account for 21.6 per cent and 13.7 per cent of employment respectively, indicating that the base for apprenticeship take up is very strong in these sectors (the two latter are also sectors with a strong apprenticeship tradition, which explains the already high levels of take up).
- With some fluctuations over the period, Administration, Transportation operations and maintenance and Engineering have all experienced an overall decrease in participation since 2003/04. Building and construction had a steady level of participation in 2003/04 and 2005/06, followed by two years of increases, only to return to the earlier level of participation in 2007/08. Child development and well-being has significantly increased between 2003/04 and 2006/07, and despite a slight fall in participation in 2007/08 has experienced overall growth during the period. It may be interesting for the local authority to look further into the reason for any increases or decreases in take up, as it may mean new engagement or disengagement from a business sector, or that frameworks are becoming better or worse suited to employers' needs, as these change.

Apprenticeship success rates by framework

Relevance

The apprenticeship framework success rate is an essential quality measure of the provision, and important in the drive for increased quality in apprenticeships set out in PSA Delivery Agreement 2. From the learner's perspective, it is also important to expect a good chance of leaving the programme with a completed qualification as labour market currency.

Success rate by framework is also a key measure for continued funding, with 50 per cent being the threshold. As the success rates presented here are calculated to also include achievement after the expected date, the rates would be expected to be higher than the timely rates.

It should be noted that success rates is a provider measure, and cannot be calculated on a learner basis. Therefore, success rates have been calculated based on providers located within the local authority, and not learners resident within the area. The success rates as presented in this report are also only showing part of the picture, as they are limited to 16-18 provision; however, for commissioning decisions and when the quality of learning provision is assessed, this is done for all age groups jointly.

There are of course factors outside providers' control that may affect the success rates, such as if the apprentice is made redundant and cannot find new employment.

How can I use it?

The success rate by framework measure can be used to look at what quality improvement and support strategies can be implemented.

Key points

- With small numbers of leavers on each framework, the success rates are not robust enough to use for analysis at this level of detail.
- If success rates on frameworks are very low, it is important to consider how important they are to employers in the area, whether there is other provision of this framework accessible to employers, and whether support is needed to improve the quality of provision rather than terminating it.

6 Apprenticeship provision pattern

Apprenticeship providers – resident learners

Relevance

All apprentices are tied to a **learning provider**, through whom funding for the apprentice is directed. However, as the learning mainly takes place at work, provision can be sourced from anywhere in the UK. This also means that the provider base for local apprentices could be shifting from year to year (although it does not tend to). Learning providers do not only include FE colleges, sixth-form colleges and private training providers, but also businesses who hold direct funding contracts with the LSC. The local authority of the learning provider notes its main location as registered with the LSC; however, the training can in fact take place at satellite campuses in another area. Knowledge of providers with whom resident 16-18 year olds are undertaking apprenticeships is important in the planning of a comprehensive offer to young people in the local authority, and to understand the full offer available to and taken up by young people in the local area.

How can I use it?

Information on which learning providers resident learners attend can be used when considering commissioning of provision, as well as joint planning with other local authorities, both within and external to the South East.

Key points

- East Berkshire College in Slough is the largest provider of apprenticeships to young people resident in the local authority, with over 22 per cent of apprentices resident in the area attached to the college.
- Over two-thirds of all resident apprentices are engaged with a provider whose head offices are based outside the local authority.

Key apprenticeship providers for learners resident in Slough^{10 11}

Training provider	Local authority	Apprentices	Share of apprentices (%)
East Berkshire College	Slough	76	22.2%
Aylesbury Training Group	Buckinghamshire	41	12.0%
Slough Borough Council	Slough	33	9.6%
Span Training & Development Limited	Oxfordshire	19	5.5%
JTL	Greater London	17	5.0%
Protocol Skills Limited	Cheshire	17	5.0%
VT Training plc	Surrey	12	3.5%
Zenos Limited	Northamptonshire	12	3.5%
Mardell Associates Limited	Greater London	10	2.9%
Bracknell and Wokingham College	Bracknell Forest	8	2.3%
Icon Vocational Training Limited		8	2.3%
Carter & Carter Group Plc	Nottinghamshire	7	2.0%
Hawk Management (UK) Limited	Greater London	5	1.5%
Heathrow Airport Limited	Greater London	5	1.5%
Skillnet Limited	Greater London	5	1.5%
Other providers	Various	68	19.8%

Source: ILR2007/08 W12.

¹⁰ The local authority of the learning provider notes its main location as registered with the LSC; however, the training can in fact take place at satellite campuses in another area.

¹¹ Delivery model, specialist provision, sector coverage are some of the reasons why an employer would choose a training provider from another region. In addition large, national multi site employers with over 5,000 employees such as British Gas, Sainsbury and Whitbread are able to hold contracts themselves overseen by the National Employer Service.

Apprenticeship providers

Relevance

Apart from understanding the provider base located in the area, it is also important to know what type of provider they are (college or business in its own right); what frameworks they offer; learner capacity; and the success rates of its frameworks. This information helps ensure a broad offer for learners and high quality of provision. It should be noted that the frameworks providers offer can fluctuate from year to year.

This section provides information on the **learning providers** located in the area, as well as the profile of **main delivery location types**. Hence, the figures in this section include apprentices from outside of the local authority as well.

This section shows information about **16-18 year old apprentices**. However, especially when considering the performance of providers (success rates) and making commissioning decisions, it is necessary to take a wider view and consider also older learners; hence the overall success rate for the provider (for apprentices of all ages) is shown here. It should also be noted that providers are judged on a broader set of information; this provides just a snapshot.

How can I use it?

Information on apprenticeship providers can be used in considering commissioning of apprenticeship provision, and whether it needs to be planned with other local authorities, regions, or even nationally.

Key points

- There are four providers of apprenticeships located in Slough, two of which have over 200 learners each (no others have over 50 learners).
- Apprenticeship framework success rates for these providers are varying, with East Berkshire College having average success rates only just over the threshold at 53.8 per cent, whilst Citroen UK and Slough Borough Council have good success rates at 76.2 per cent and 78.3 per cent respectively.
- There are two specialist providers, who in 2007/08 only offered a single framework: Slough Borough Council (Business Administration) and Parenta Training (children's care learning and development).
- There is a strong inflow of learners to providers offering vehicle related frameworks in the local authority.

Apprenticeship providers located in Slough

Recruitment areas for main providers

Relevance

Which providers employers choose to engage with for apprenticeships for their young employees is important as there may be popular provision which engages employers across local authority borders, or natural access flows which make providers natural options for engagement even cross local authority borders.

How can I use it?

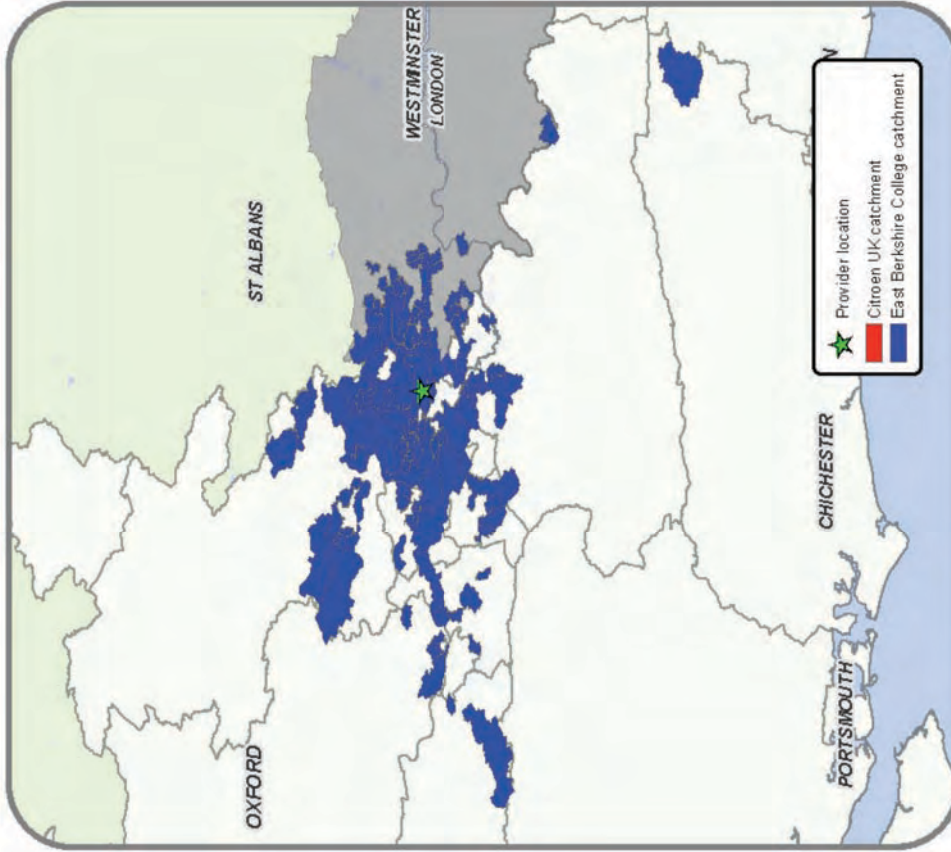

Information on catchment areas and neighbouring provision provides a richer understanding of the locally available provision – although it may be accessed by employers and apprentices from across the country. It can also be used for collaborative working across borders.

Key points

- East Berkshire College has a relatively concentrated recruitment area, drawing apprentices mainly from Slough and a nearby area with the college at the centre.
- Citroen UK has the widest reach of the training providers, drawing learners not only from the South East, but from the whole country.

Type of delivery locations in Slough

Relevance

Apprenticeships can be fully delivered in the workplace. However, for various reasons – such as an employer preference for day-release – the actual learning could also be delivered at a provider; or through a mix of the two.

The delivery location of the framework indicates where the main delivery is taking place, and is a good indicator of the delivery methods in place in the area. Where the site is noted as 'other', this could either be a secondary campus of the provider, or an employer location which is not the same as the main workplace location – this requires further manual analysis to fully be understood.

How can I use it?

This information can be used to understand delivery models used in the local area.

Key points

- Apprenticeships in Slough are mainly delivered fully in the workplace; 37 per cent of all apprenticeships taken by resident learners are delivered this way, although the proportion of learning delivered fully in the workplace would be expected to be high for apprenticeships.
- The second largest type of main delivery location is at the main site of the learning provider.

Type of delivery location for Slough resident apprentices

Source: ILR2007/08 W12.

Travel-to-delivery location patterns

Relevance

Understanding the patterns of travel to the main point of learning (delivery location) for apprenticeship learners resident in Slough is important, to ensure that relevant provision is available in the area and to be able to further investigate the reasons for learners travelling. **As the point of delivery that learners travel to can be either the training provider, or the employer, depending on where the majority of learning takes place, there may be good reasons for learners to travel across local authority borders.**

How can I use it?

This information can be used to see learners' travel patterns for their apprenticeships, and to further investigate the reasons why they go out of area: do they go because of the location of the employer; easy travel routes; closer location; specialist offer of provision; or lack of local offer?

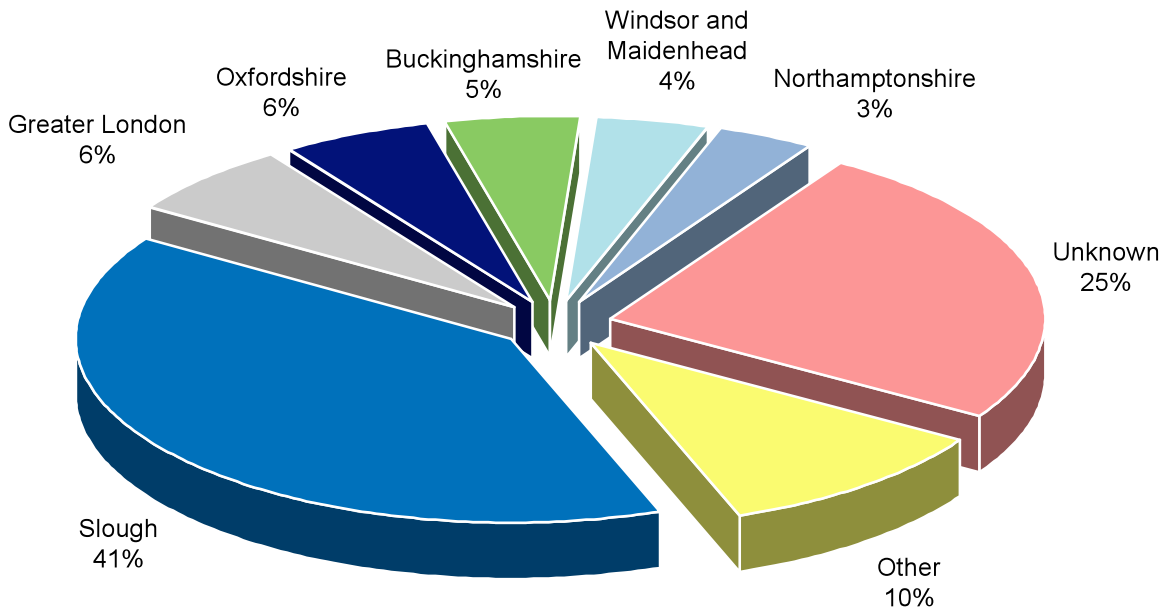

Key points

- There is a marked net inflow of apprentices to Slough.
- Only 41 per cent of apprentices resident in Slough also conduct the majority of their learning in Slough.
- The remainder of apprentices have their main learning delivery location spread across a number of local authorities, mainly London (6 per cent), Buckinghamshire (5 per cent) and Oxfordshire (5 per cent), however, the main delivery location of 25 per cent of apprentices is unknown (no location recorded, or location incorrectly recorded, on the ILR).
- When looking at apprentices who have their main delivery location in the local authority, the picture is even less local; only 29 per cent are also resident in the area. The majority of the remainder of apprentices come into Slough for their main learning delivery from London (25 per cent), Buckinghamshire (21 per cent) and Windsor and Maidenhead (10 per cent).

Slough flow of apprentices

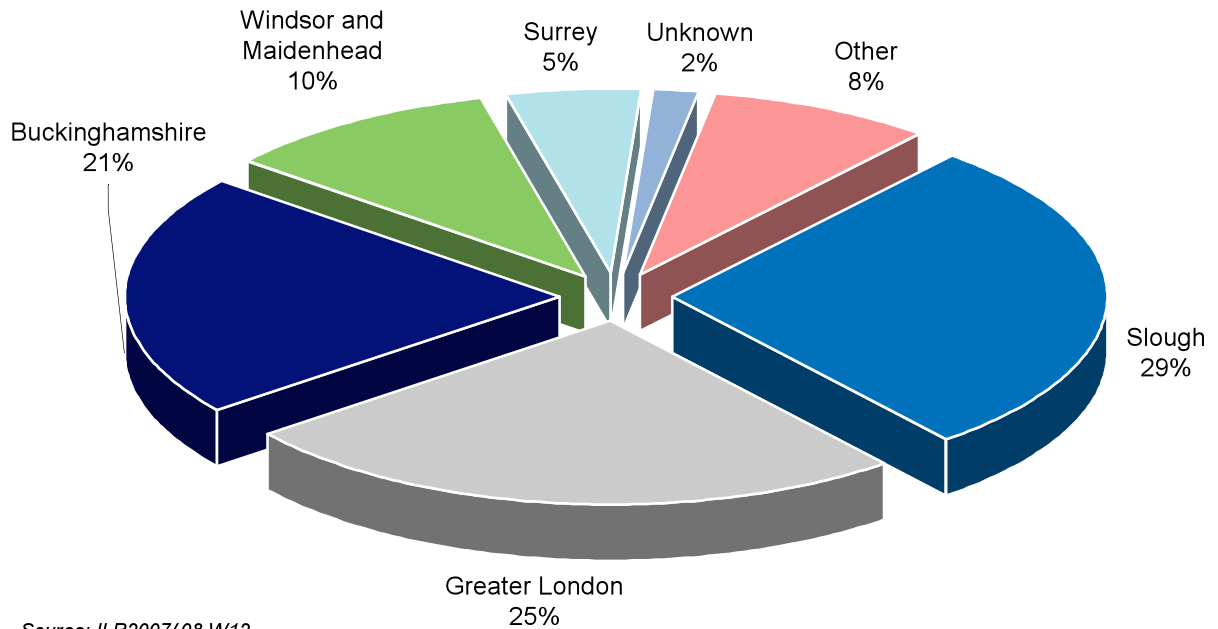

Outflow of 16-18 apprentices	207
Inflow of 16-18 apprentices	349

Where do Slough resident apprentices have their main delivery location?

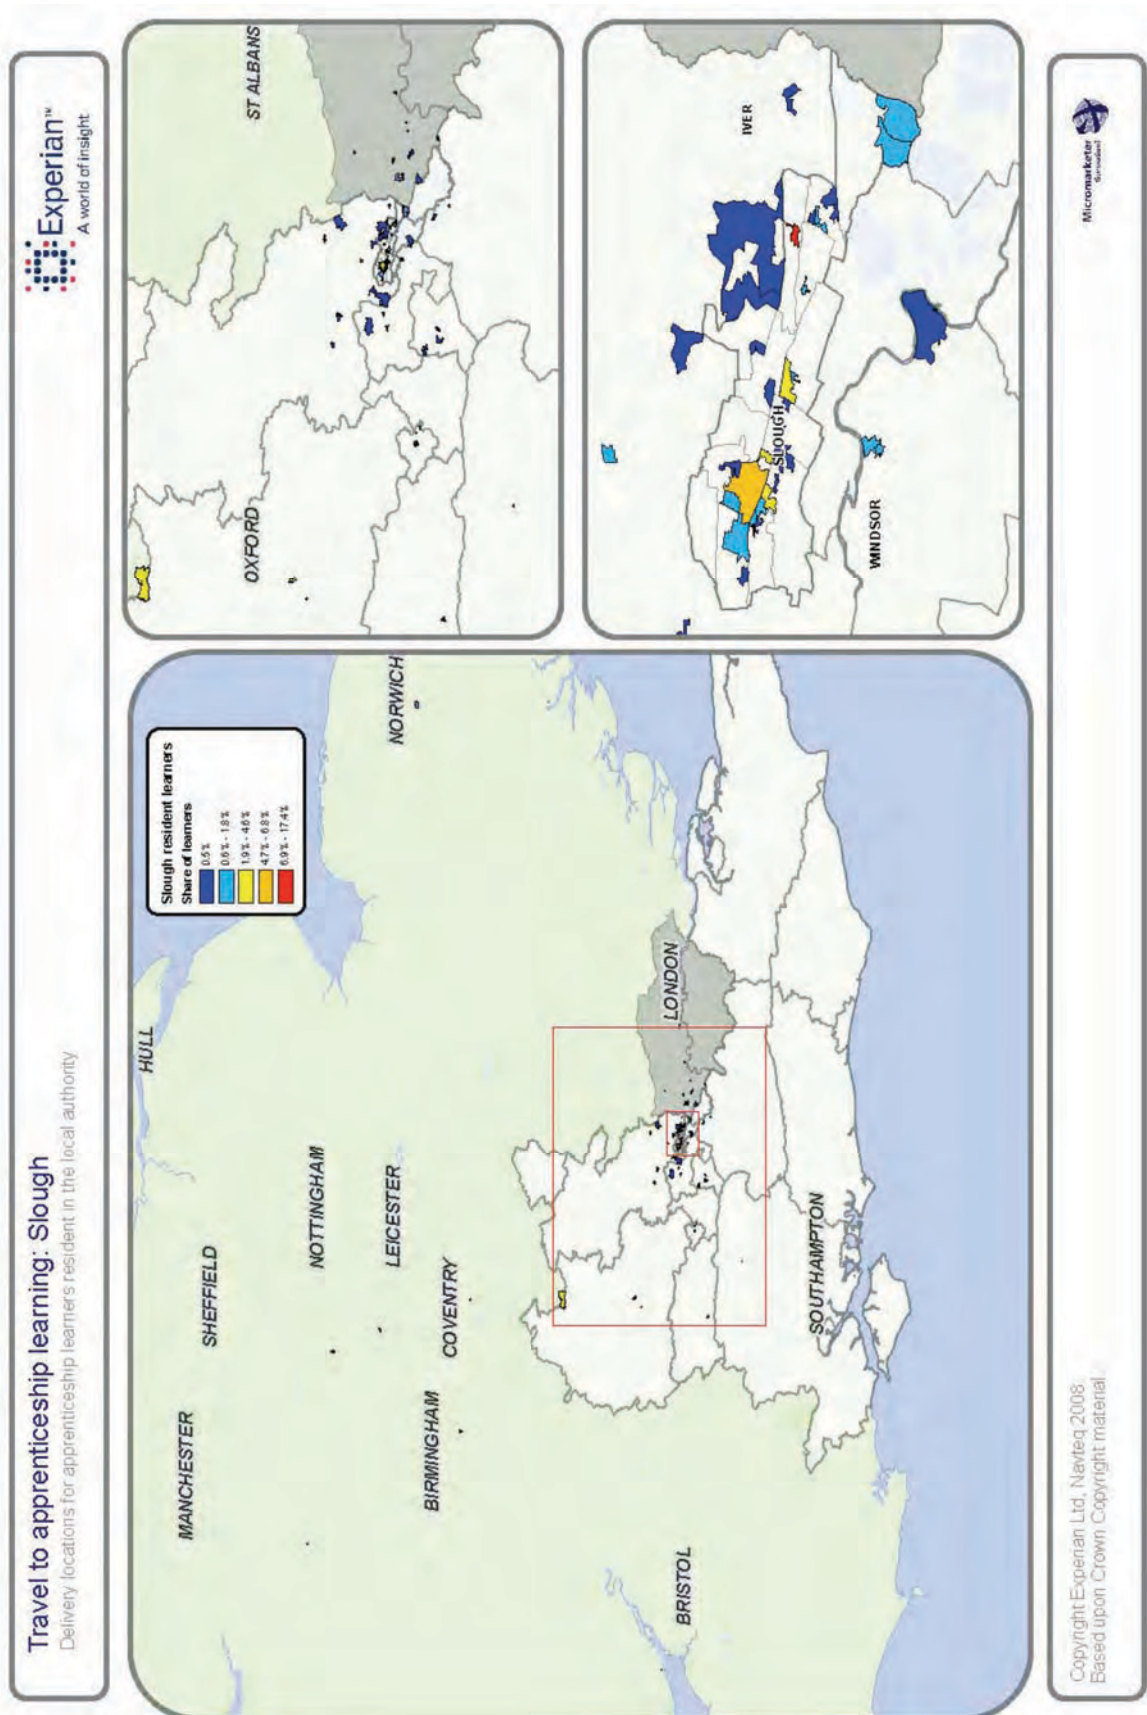

Source: ILR2007/08 W12.

Where do apprentices who have their main delivery location in Slough come from?

Source: ILR2007/08 W12.

The map on this page shows where the main delivery locations for **apprentices resident in Slough** are located. For example, there is a postcode area in the west of the local authority where between 4.7 and 6.8 per cent of apprentices do the main part of their learning (orange on the map).

7 Slough – economic and labour market profile

Population estimate and forecasts¹²

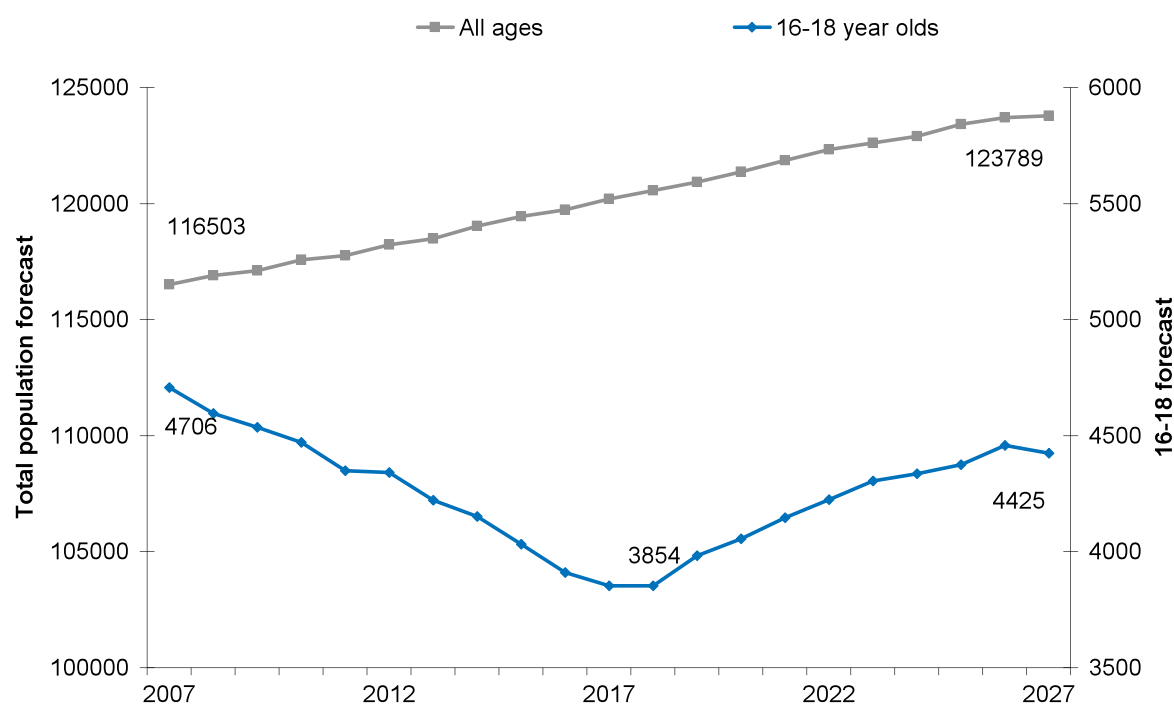

Key points

The size of the 16-18 age group in the local authority is essential to know for all planning of post-16 education and training, as it will determine the need for learning places, especially when the compulsory participation age is raised in 2013.

It also has particular relevance for the apprenticeship target of one in five young people being engaged in an apprenticeship by the end of the academic year 2019/20.

- With smaller age groups coming through, the 16-18 age group is forecasted to decrease until 2019, after which it will increase again. There may therefore be a need for fewer places up until 2019, but long-term planning is needed for the increased demand for places that will follow.

Population forecast until 2027, total population and 16-18 year olds

Source: Experian.

¹² The forecasts presented have been derived by Experian with ONS population estimates as a base.

Young people in employment without training

Relevance

Young people (16-18 year olds) who are in employment without training (NET) are a key target group for Apprenticeships where their jobs can support an apprenticeship framework and they have sufficient skills to be able to undertake the programme. Once the compulsory participation age for education is raised in 2013, Apprenticeships will be an important form of education and training that young people NET may wish to participate in – Apprenticeships could therefore provide a re-engagement with learning and provide important qualifications and career enhancement for this group.

How can I use it?

Local data on young people NET will allow local authorities to target marketing of apprenticeships to young people NET and their employers.

Key points

- Slough has a share of the young population in employment without training much lower than the region and England, standing at 4.5 per cent in January 2009 (compared to 7.2 per cent and 6.7 per cent respectively). This is a reduction on the previous year, by 1.7 percentage points.
- There could be a strong market for further apprenticeship take up within this group. Targeting those in this group with suitable skills and who are in jobs that could support an apprenticeship framework and their employers for 'learning while earning', that is, staying in employment but also enrolling in fully-funded training, would provide a helpful contribution towards reaching the apprenticeship target for 2020.
- As the map overleaf shows, the majority of Slough wards are among the wards in the South East with the highest proportion of 16-18 year olds NET.

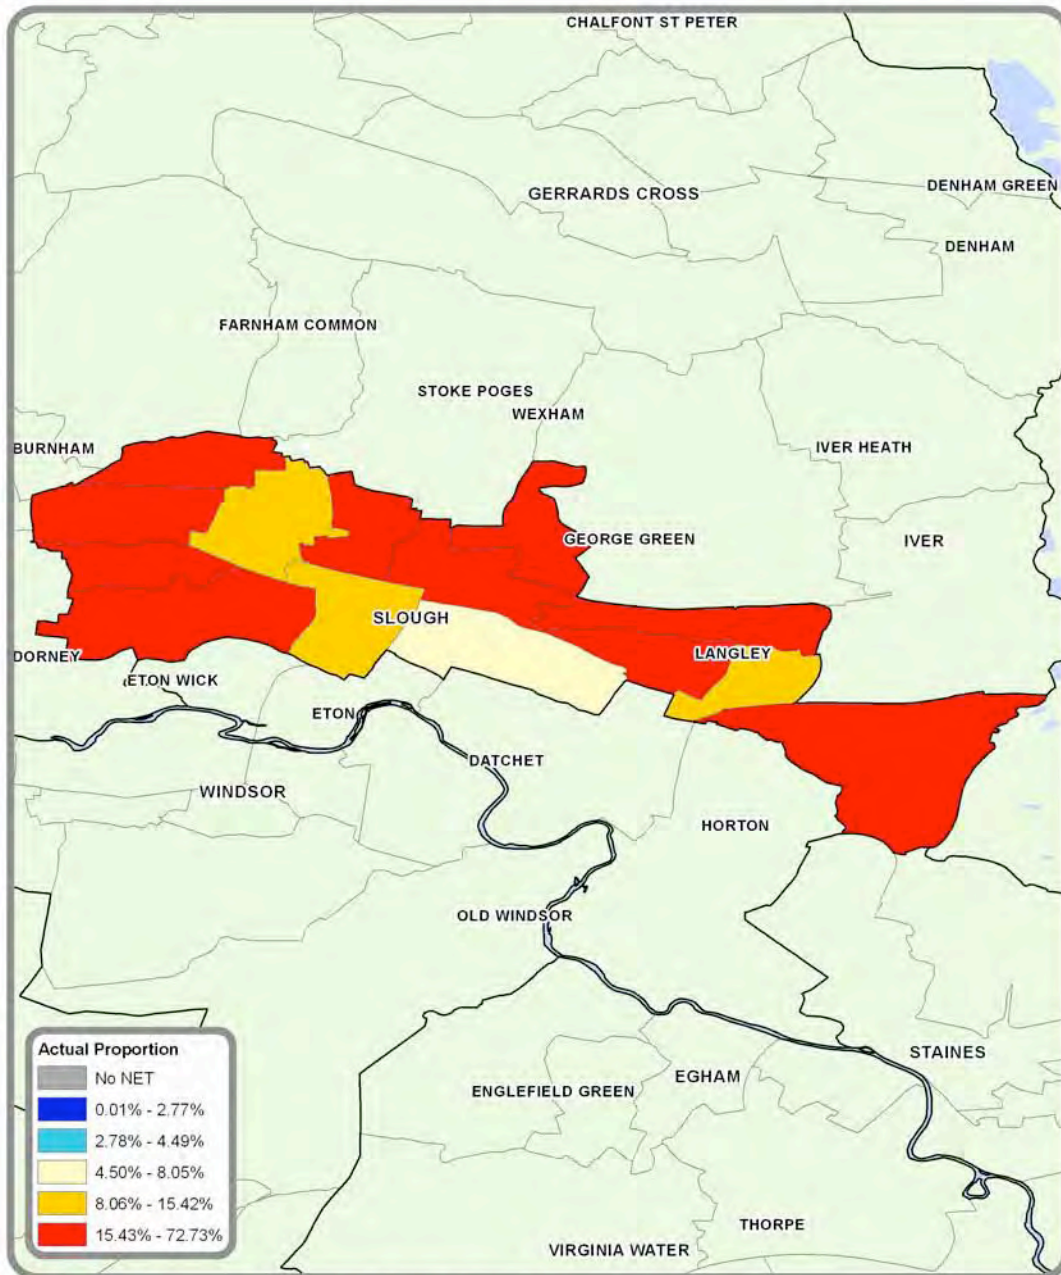

Young people in employment without training (NET)

	Actual number in Employment without training		Share of 16-18 population (%)	
	Jan 09	Jan 08	Jan 09	Jan 08
Slough	203	287	4.5%	6.2%
South East	23,125	27,788	7.2%	8.6%
England	133,480	156,759	6.7%	7.8%

Employment by sector in Slough

Key points

Certain sectors are more likely than others to engage in apprenticeships. Sectors with a tradition of apprenticeship delivery, such as construction, engineering, manufacturing and catering are all more likely to engage. It should also be noted that the public sector has until recently has a relatively low engagement with apprenticeships given the size of its workforce; it is now part of the national strategy to expand apprenticeships in the sector.

- Distribution, hotels and restaurants; manufacturing (inc. engineering) and transport and communications – all sector with a strong tradition of apprenticeships – are strong in Slough, making them good targets for apprenticeship expansion.
- The public sector is the largest employer of the Slough resident workforce. This is a key target sector for Apprenticeship expansion nationally, and one where the local authority has a lot of leverage.

Employment by sector, whole workforce

Source: Annual Population Survey June 2007-July 2008.

Employment by occupation in Slough¹³

Key points

Occupations at skill levels 2 and 3 – those from associate professional to process, plant and machine operatives in the graph – are more likely to engage with apprenticeships, as these occupations tend to require qualifications at Level 2 and 3; sectors with a strong intermediate occupation base are key for apprenticeship targeting and expansion for this reason.

- There is a fairly even spread of occupations across the Slough workforce, with a fair proportion in occupations which often are the target for apprenticeships.
- Of the occupations at skill levels 2 and 3 where apprenticeships often are used, Associate professional and technical, Administrative and secretarial and Process, plant and machine operatives are the strongest occupations within the workforce. There should be a key focus on apprenticeships for these occupations.

Employment by occupation, whole workforce

Source: Annual Population Survey June 2007-July 2008.

¹³ This section focuses on occupations at skill levels 2 and 3 as identified in ONS guidance on Standard Occupational Classifications (SOC) 2000. These are occupations likely to require a qualification at Level 2 or 3.

Employment by size of firm

Key points

The literature on apprenticeships shows that larger firms – with larger budgets for training and the opportunity to provide staff for training and supervising – are more likely to take on apprentices than smaller firms. However, considering that SMEs make up most of the business base across the UK, they remain very important in apprenticeship delivery. The available data on employment by size of firm does consider the amount of commuting into and out of an area; this could impact on the picture.

- Looking at **firms located in Slough**, just as regionally, the majority of firms employ ten workers or less. However this is less frequently the case in Slough where a larger proportion of firms employ more than 10 learners (23 per cent in Slough compared to 14 per cent in the south east).
- Similarly, looking at the **workforce in Slough**, two thirds of them are employed by larger firms. This supports the conclusion that large employers are more important in Slough than elsewhere.

Firm size (% of firms located in Slough employing a certain number of people)

Source: ABI 2005 through SEE-IN Data Hub.

Firm size (% of firms located in Slough employing a certain number of people)

	% of firms employing 1 to 10 workers	% of firms employing 11 to 49 workers	% of firms employing 50 workers or more
Slough	78%	16%	7%
South East	85%	11%	3%

	% of employees working within firms that employ 1 to 10 workers	% of employees working within firms that employ 11 to 49 workers	% of employees working within firms that employ 50+ workers
Slough	13%	22%	65%
South East	23%	25%	52%

Source: SEE-IN Data Hub (ABI 2005).

Workforce qualification profile

Key points

The literature on apprenticeships shows that businesses are more likely to engage with apprenticeships in areas and sectors where the qualification profile is predominantly at Level 2 and Level 3 – the levels of apprenticeship programmes.

Understanding the qualification level of the workforce, the occupational make up as well as qualification attainment at Key Stage 4, helps plan for the level of apprenticeships that need to be offered in the area – this could also be differentiated by sector. It should however be noted that apprenticeships are not just taken up at the ‘next level’ of study, but are vocationally specific and the level of training therefore needs to be relevant to the job role.

The absence of entry level literacy and numeracy can also be a barrier to apprenticeships.

- Current Key Stage 4 achievement is much higher than the national average, at 59.7 per cent. This still means that 40 per cent of school leavers leave without a Level 2 qualification – it will therefore be important to have a strong integrated offer at post-16 to support progression to apprenticeships.
- The 16-19 age group in Slough has lower qualification levels compared to the region and England, with 57.1 per cent of the population in this age band qualified to at least Level 2. However, the Level 2 Apprenticeship is still important for the over 40 per cent of the age group who have not yet achieved a Level 2.
- For the share of the young population who already hold a Level 2 qualification, a strong offer of Advanced Apprenticeships (Level 3) is important to provide progression routes from Apprenticeships at Level 2, if this also matches local business needs.
- There are still 4 per cent of pupils in Slough who leave compulsory education **without even a qualification at Level 1**; for all young people to be able to continue learning, it is therefore important that there is an Entry level offer also post-16.
- Slough also has a slightly lower share than the region of 19 year olds who have achieved a Level 2 or a Level 3 qualification, with 22.8 per cent of 19 year olds not having achieved a Level 2 qualification (20.4 per cent regionally). This indicates that provision up to this level will still be important to provide for young adult learners to ensure they gain valuable qualifications.

Key Stage four achievement, Slough

	Slough	England average
5 or more grades A*-C including English and maths	59.7%	47.6%
Pupils NOT achieving 5 or more grades A*-G (Level 1)	4.1%	8.4%

Appendix A

South East providers of apprenticeships 2008/09

This list gives details of the Apprenticeship contracts managed within the South East region for this academic year. The training providers delivering in a local authority area may include other providers who have contracts managed by other LSC regions or the National Employer Service.

Delivery model, specialist provision, sector coverage are some of the reasons why an employer would choose a training provider from another region. In addition large, national multi site employers with over 5000 employees such as British Gas, Sainsbury and Whitbread are able to hold contracts themselves overseen by the National Employer Service.
